🪑 WORK PREFERENCES

Looking for a	Internship Job
Can start working	May 2020
Preferred location	Ahmedabad, Rajkot, Anand, Vadodara / Baroda, Surat, Anywhere in North India

⬡ INTERNSHIPS AND PROJECTS

Internships	**Technozer Solution** (Duration 1 Months) It was totally newly experienced for me and I learned and enjoyed a lot how developers manage the project work and besides how they manage work while developing in a team. Skills used - Bootstrap, css3, Html5, jQuery, Javascript, Laravel, PHP
Projects	**Fingerprint Based ATM** (Duration 8 Weeks) The main objective of this project is to overcome the realtime problem like everywhere we have to bring our ATM with us so by this project we made system to withdraw money though out finger authentication, no need for physical ATM card.. Skills used - Java, Swing, MySQL **Automated Solar System** (Duration 8 Weeks) The main goal of this project was to increase the power production of solar. We made an automated model that will move the solar surface in front of the sun so the maximum sunlight solar can catch.. Skills used - Ardunio **Faculty Tracing App** (Duration 10 Weeks) We have a big campus in our college so sometimes we face difficulty to find faculty so to overcome this problem we made this application that helps to find faculty according to their GPS the location that updates location every 5 seconds and their timetable of lectures.. Skills used - Android Studio, 000freewebhosting, google map api

FreshDaily (Duration 2 Weeks)
FreshDaily is an android bases application developed for online selling of grocery items. We Developed this project during Smart Gujrat Hackathon - SGH2020. Customers can but grocery on subscription-based or single time order. We developed an admin site to handle customer data, inventory, stocks, daily based subscribers, billing and to manage orders. Now, we are planning to develop one separate app for delivery boys so the customer can view and track the order..
Skills used - Android Studio, Amazon Ec2, Amazon RDS, Razorpay payment API, PHP
